

## 'visual hallucinations'

25/1/2019

There's certainly not many clued in to that 'visual hallucinations' are just examples of when someone is **ClairVoyant**. With the enlivenment of the Brow Chakra (see *following image*) the person becomes ClairVoyant.

One thing that I'll certainly say about most Psychiatrists – **"They don't appear to be very well-read!"**

Honestly - there is a point I get to where I get sick of rubbishing them! There is a reason why the Brow Chakra is colloquially called "the Third Eye".
