"Mainstream PSYCHIATRY"* is exposed as being unscientific as it has no answers to some very basic questions. These **QUESTIONS** concern quite well-known phenomena associated with Mental Illnesses. [The Inmates are Running the Asylum - film](#)

ANSWERS

1 Why is it common for people suffering from a Mental Illness to 'hear voices'?

in psychiatry 'hearing voices' is a possible symptom of schizophrenia - see [SUCCESSFULschizophrenia.org](#)

If ever there's one single thing which exposes Psychiatry for being what it is, unscientific, it is this! **"M-theory"**, a respected Principle in Cosmology where there is an infinite number of dimensions, is simply either ignored or not considered at all in this **ANTI-science called Psychiatry!** The 'Mental Patient' is simply accessing information/experience from another dimension(s).

In modern-day parlance it's called channelling or simply being psychic!

4 Why's it common for people who have had a Mental Illness to have done something amazing?
